

FOR IMMEDIATE RELEASE

INNOVATIVE PHOENIX COMPANY LANDS ON THE INC. 5000 LIST FOR FOURTH CONSECUTIVE YEAR

PHOENIX, Ariz.—BestBill®, a leading provider of innovative payment technology, has been honored as one of the fastest-growing private companies in America by *Inc.* magazine. BestBill has appeared on the Inc. 5000 list since the list's launch in 2007.

“What sets successful businesses apart during this economic downturn are companies that can innovate with speed and introduce new technology that is relevant and serves an important business need.” said Dan Haugland, founder and CEO of BestBill. “Companies want to get paid, and they want to get paid faster. Our success is based on the ability to act quickly and create exceptional payment and billing tools that the marketplace is currently clamoring for.”

Companies that once thought they could not incorporate online bill pay, pay-by-phone, payment phone reminders, lockbox remittance, and electronic statements can now add BestBill's technology into their existing billing processes.

BestBill's ability to innovate and provide easy-to-use payment technology has helped the company grow despite the current economic challenges. The 2010 Inc. 5000 list recognizes the accomplishments of privately-owned businesses in the U.S. based on percentage revenue growth from 2006 through 2009. BestBill grew 50% during the three-year period and ranked No. 3,514 on the list. Additionally, BestBill was recognized as one of the top 50 companies in the Phoenix area.

About BestBill

BestBill delivers a variety of payment solutions and services that get companies paid faster. Since its founding in 1999, BestBill has grown to serve customers nationwide from its Phoenix headquarters and its Midwest office in Michigan. BestBill's unique business culture has earned numerous awards and recognition in local and national business communities. BestBill received the 2009 Arizona Business of the Year award by the U.S. Small Business Administration. For more information, visit www.BestBill.com.
