

# PRINT & MAIL

Save money on postage and mailing costs, and improve in-house processes with BestBill's Print & Mail service. We provide a cost-effective way to deliver critical documents to your customers online and through the mail.

Our Print & Mail technology captures an image of each document, marking it with the time and date for proof of mailing. We offer full transparency to track a document's progress—allowing you to literally see your billing documents in WebView™ immediately and in real time.

## QUALITY CONTROL

BestBill is committed to delivering documents when and how we promised. We have implemented several fail-safe measures that allow us to “trust but verify” the quality of the products we deliver. Here are a few of our Quality Control measures:

- A Data Matrix locates where each document is in the production process, what other materials need to be included, and when it needs to be mailed.
- Content Validation is built into each data import and will set a trigger if data is incorrect.
- Custom Applications can automate the creation and transmission of client files.
- A “Print Quality Check” randomly flags a job and rejects it from our equipment until a physical quality check has been made.
- Notifications are sent to clients each time an online sample is ready for approval on WebView.
- A Quality Control team member looks at each job, inspecting and checking for potential issues.

## BEST TECHNOLOGY. BEST SERVICE.

BestBill combines technology with unparalleled service—making your billing process easier, faster, and less expensive. Your invoices, statements, and other communications are presented when and how you want them delivered.

Print & Mail is part of our suite of products and services designed to enhance a company's cash flow position, and improve the delivery and presentation of billing documents. Visit [www.BestBill.com](http://www.BestBill.com) or contact us today for additional information.

## BENEFITS OF PRINT & MAIL

- ✓ Track the progress of your documents in real time, 24 hours a day.
- ✓ Proof of Delivery—all documents are marked with a time and date stamp.
- ✓ Documents are created and in the mail within 24 hours vs. 5-7 days it takes to process them internally.
- ✓ Each time data is processed, address database is updated.
- ✓ Data is converted into branded, well-designed, easy-to-read PDF statements.
- ✓ Customers can access their account, view statements, and make a payment online.
- ✓ View documents and control the Print & Mail process for all documents.
